Today, almost twenty years after the introduction of the percentage tax mechanism in Hungary and 10 years after the latest and only comparative work, a need emerges on evaluating the mechanism towards its original ambition.

What is the role of the mechanism in the support of the civil society and in the development of philanthropic culture from a longer-term perspective?

Based on the findings of the Central and Eastern European Percentage Tax Designation research study, this two-days international conference will share the lessons learnt that can be instrumental and useful to policy makers, donors and civil society actors not only in the countries that currently use the mechanism, but also in other countries that look for innovative ways of public funding towards civil society or otherwise strengthening the civil society.

PRACTICAL INFORMATION

Safety and security	The situation in Slovakia is in this aspect similar to all the European neighboring countries. Especially in places, where many tourists pass by (i.e. The Old Town in Bratislava, bus and train stations, means of transport), you have to pay attention to your personal stuff and valuables. For motorists the usual measures are valid – it is recommended to park the cars on guarded parking places, not to leave valuables unnecessarily in the parked car. Its the best to keep your valuables in the hotel safe and not to carry too much cash with you.
What languages are spoken	English and German are the most often used foreign languages. Less frequent is the knowledge of French, Spanish, Italian or Russian. In the South of Slovakia Hungarian is used many times.
Electricity	230 V/50 Hz, standard socket with safety pin
Smoking	In catering facilities, in trains and at workplaces smoking is allowed only in areas reserved for smokers. Smoking prohibition is valid in closed public areas (covered bus stops, closed sports fields), in publicly accessible spaces (stations, cinemas, theatres, museums, galleries, exhibition grounds and similar) and at schools.
Vaccination and medical measures	Before the arrival to Slovakia no special health precautions or medical measures are necessary. We recommend a tick vaccine, especially in case, that you plan to spend a lot of time in the woods. It is also suitable to carry with you some insect repellents, because in areas close to water can be an increased occurrence of gnats.
Health service, emergency	There are hospitals in all larger towns. In smaller towns and tourist areas outpatient clinics and pharmacies are available. Pharmacies are open usually on workdays from 8:00 to 18:00, during weekends and holidays there is always one pharmacy in town on duty. It is recommended to close a health insurance contract before coming to Slovakia, which is usually a part of the travel insurance package. When needing emergency health care call 112 or specialized rescue service/ambulance.
Drinking water	There is drinking water from the taps, besides some exceptional cases, when a notification warns about the possible defect.
Slovak cuisine	The Slovak national dish is "bryndzové halušky" – a sort of potato dumplings (halušky) with special sheep cheese (bryndza) and usually also topped with fried bacon. You can get this specialty in regular restaurants, too. But it tastes best in typical wooden sheds or chalets, where also other traditional Slovak meals are on the menu. In the restaurants and bars it is usual to leave some tip for the waiter by rounding up the resulting amount, in the majority it is about 5-10 % of the bill. It is not obligatory and the amount should within the possibilities reflect the guests satisfaction with the service.
